

## Company Profile

### Business Description

As an innovative company, UMT United Mobility Technology AG primarily stands for the integration of customised solutions in the field of digitalisation and automation of business processes. With its self-developed payment gateway, intelligent solutions for document processing and blockchain solutions in the area of supply chains, UMT AG is successful in rapidly growing segments that are in high demand.

The focus here is on consulting and the creation of digital and scalable solutions that are strictly customer-oriented, especially for SMEs and larger companies. In addition to organic growth, UMT AG strives to acquire both customers and technologies through targeted acquisitions of companies. The IT and consulting expertise built up over a decade forms the basis for value-creating investments in companies that contribute to the digital transformation of SMEs.
